

STANDARDISED RULES FOR CARRYING PORTABLE ELECTRONIC DEVICES OFFSHORE – COMING SOON!

From 1 July, new rules will take effect for transporting Portable Electronic Devices (PEDs) on offshore helicopter flights. These changes are designed to enhance safety and reduce the fire risk posed by lithium-ion batteries.

WHAT YOU NEED TO KNOW

Limits Apply – A maximum of six (6) PEDs per person will be allowed.

Condition Matters – Devices must be in good condition and securely packaged.

Powering Off – All PEDs must be switched off completely before and during flight.

Some Items Banned – E-cigarettes and power banks will NOT be permitted.

Why is This Important?

Helicopters have limited capacity to contain fires in flight.

These new measures help protect everyone onboard by reducing the risk of battery-related incidents.

What's Next?

Download the full guidance from www.stepchangeinsafety.net to make sure you are aware of the new requirements before 1 July.

Got any questions? Please contact your company's logistics team or reach out to info@stepchangeinsafety.net

ALL DEVICES PRESENTED FOR TRAVEL MUST BE IN GOOD CONDITION AND APPROPRIATELY PACKAGED

Laptops and tablets	Mobile phones	Ear Buds	Smart Watches & Fitness Trackers	Other PEDs	E-cigarettes, power banks and spare lithium-ion batteries
Condition: Good, undamaged	Condition: Good, undamaged	Condition: Good, undamaged	Condition: Good, undamaged	Condition: Good, undamaged	
Mode: Flight safe and switched off	Mode: Flight safe and switched off	Mode: Turned off where possible	Mode: Flight safe and switched off	Mode: Turned off	NOT PERMITTED
Transport: Protective packaging in helicopter baggage compartment	Transport: Protective case in flight suit leg pocket	Transport: Protective case in flight suit leg pocket	Transport: Worn or stored in protective case and in flight suit leg pocket	Transport: Protective packaging in helicopter baggage compartment
